Sir:

Pursuant to 37 C.F.R. §§ 1.97 and 1.98, applicant(s) hereby submit(s) an Information Disclosure Statement for consideration by the Examiner.

I. LIST OF PATENTS, PUBLICATIONS OR OTHER INFORMATION

The patents, publications, or other information submitted for consideration by the Office are listed on the PTO-1449(s), attached hereto.

II. COPIES (check at least one box)

- a. ☒ Copies of cited U.S. patents and patent application publications are not included. Copies of foreign patent documents and non-patent literature are included.
- b. ☐ Some or all of the documents listed on the PTO-1449 are not enclosed because they were cited in the International Search Report and copies should already be in the PTO file. If copies are needed, please contact the undersigned.

III. CONCISE EXPLANATION OF THE RELEVANCE  
(check at least one box)

a. ☐ **DOCUMENTS IN THE ENGLISH LANGUAGE**

The patents, publications, or other information listed on the attached PTO 1449 are in the English language and therefore, do not require a statement of relevancy.

b. ☒ **DOCUMENTS NOT IN THE ENGLISH LANGUAGE**

A concise explanation of the relevance of all patents, publications, or other information listed that is not in the English language is as follows:

An English Abstract of JP 2001-342330 is attached.

c. ☐ **ENGLISH LANGUAGE SEARCH REPORT**

An English language version of the search report or action that indicates the degree of relevance found by the foreign office is attached, thereby satisfying the requirement for a concise explanation. See MPEP 609(III)(A)(3).

d. ☒ **OTHER**

The following additional information is provided for the Examiner's consideration.

The following comments are provided concerning two previously cited documents.

EP 1120432 A1 (corresponding to JP 2001 342330A) discloses subject matter as described below.

In the case of preparing a polyester block copolymer by allowing to react a crystalline aromatic polyester with lactones, 0.1-5.0 parts by weight of at least one epoxy compound having at least one epoxy group is mixed with 100 parts by weight of the polyester block copolymer to prepare a resin composition. The resin composition contains lactone chains.

As the epoxy compound having at least one epoxy group, an epoxy compound having lactone chains are mentioned at, for example, column 7 (lines 37-49) in the JP. The column 7 (lines 37-49) is pointed by the Search Division.

On the other hand, in a resin composition of the present invention (claim 1), a thermoplastic polyester resin is mixed (formulated) with an epoxy compound having lactone chains.

In the resin composition, the thermoplastic polyester resin does not contain lactones. The thermoplastic polyester resin includes a polyethylene terephthalate, a poly (1,4-butylene terephthalate), a poly(1,4-cyclohexanedimethanol terephthalate), etc., and a mixture thereof.

That is, the resin composition of the present invention (claim 1) is different from the resin composition in the JP (EP).

Even a skilled person cannot expect the resin composition of the present invention (claim 1) from the resin composition in the JP (EP) in which a resin composition containing a resin having a chemical structure is mentioned.

The disclosure of JP 2002-194184A completely corresponds to the present US application No. (10/520,120). Because the present US application is filed based on PCT/JP2002/006792 (WO 2004/005399 A1) having international filing date of July 4, 2002, JP 2002-194184 A, which published on July 10, 2002, is not prior art to the present application.
